

# The enCloud™ Management System

## Routers and Rules Module

**T**You can track your EN-400™, EN-1000™, EN-2000™, EN-3000™, and EN-4000™ routers (EN™ devices) via a direct connection to your computer, or over a LAN, or through Encore Network's enCloud™ management system.

The enCloud™ system lets you track your network from anywhere with a connection to the internet. You can use a computer, a tablet, or a smartphone to track your devices.

**Note:** For a quick basic configuration, without details, see the [QuickStart Guide for the enCloud™ and enSite™ Management Systems](#).

### List of Documents

The *Routers and Rules Module for enCloud™* contains the following documents:

- For EN™ Routers (the EN-400™, EN-1000™, EN-2000™, EN-3000™, and EN-4000™)
  - › [Configuring an EN™ Router to Send Data to enCloud™](#)
  - › [Using enCloud™ to Update EN™ Router Firmware](#)
  - › [Using enCloud™ to View a Device's Data Update Interval](#)
- Rules
  - › [Developing Rules for the enCloud™ Management System](#)
  - › [Sensors for Rules in the enCloud™ Management System](#)

**Note:** Also see additional documents and modules in the [enCloud™ Management System Document Set](#):
